Attn: Ms. Jayne Browning

RE: PART "B" PERMIT APPLICATION  
JOHNSON CONTROLS, INC.  
GOSHEN, IN 46526  
IND009549593

Dear Ms. Browning:

This letter is notification that Johnson Controls, Goshen, Indiana, IND009549593 will be submitting a closure plan of its hazardous waste management unit in accordance with 329IAC 3-21 with the intent of reverting to a large quantity generator.

The Part "A" issued to Johnson Controls on November 3, 1980 was revised on April 11, 1987, to reflect "active portion" of facility as storage (S01) only. See enclosed Part "A" and notice of compliance letter dated September 25, 1987, (case no. V-427).

The tank treatment (T04) listed on original Part "A" is an exempt process under the waste water treatment unit exclusion (329IAC 3-15-1(c)(9)).

The tank storage (S02) contains virgin material and does not meet the requirements of a hazardous waste.

Sincerely,

JOHNSON CONTROLS, INC.
